Env-Wm 1402 - Control of Aboveground Petroleum Storage Facilities Rules

These rules establish requirements for the design, installation, operation, maintenance, monitoring and registration of aboveground petroleum storage facilities to minimize contamination of the land and waters of the state due to the improper storage and handling of petroleum in aboveground storage tanks. The amendments are intended to elucidate the existing rules and ensure the rules are consistent with existing federal aboveground storage tank requirements. Mr. Woodard and Mr. Juranty reviewed the information with the Council members and answered the Council's questions.

Chairman Richards asked the Council members to submit any questions regarding the rules directly to Mr. Woodard and/or Mr. Juranty no later than March 10, 2005.
